

Customer Happiness Awards 2022 - Scoring Process (Company Nominations)

Customer Happiness Awards is a pioneering initiative to felicitate companies that are blazing the trail with outstanding customer initiatives to deliver Customer Happiness par excellence.

It's our endeavour to ensure that we maintain the highest degree of transparency with each of the participating companies as we go through the process of selecting the winners across categories.

Nominee Review Panel

The Nominee Review Panel will ascertain all the nominations that have come in and ensure they are legitimate companies who meet the criteria in the categories they have selected. Upon acceptance of the nominations, the nominees will be informed and written submissions will be awaited.

Shortlisting Review Panel

Upon receipt of the supporting documents from the nominees, the Shortlisting Review Panel, will assess the nominees on the basis of predetermined criteria which will remain constant across all company award categories. Nominees who fulfill all the criteria and submit all the relevant documents and can demonstrate its worthiness for the award, will be shortlisted as finalists. Shortlisted companies will be notified.

CHSA Jury

The finalists will be required to meet the Jury for a Q&A round on a pre-decided date. The Q&A round will serve the purpose of dispelling any questions or doubts that the Jury may have. Ultimately, the company bagging the highest score on the written entry as well as the presentation combined will be the winner in the stated category. The CHSA Jury's decision will be final.

Customer Happiness Awards Scoring Overview

Each nomination will be scored against 4 parameters whereby the total score will be 100. Since the weightage assigned to each parameter will be different, the marking score for each parameter will not be equal.
